

Undergraduate Certificate in Supply Chain Management

The **Certificate Program in Supply Chain management** is designed for both non-business and business majors at Seton Hall University and other regionally accredited colleges. Supply Chain Management integrates supply and demand management functions within and across companies. Over the past few decades, supply chains have risen in prominence within many companies. This has created a growing need for students who can contribute to various parts of the supply chain by means of specializations obtained during their higher-education.
